3. Whether the user needs registration or periodic return filing
4. Whether the requirement concerns a cooperative society, NGO, partnership firm, professional tax or VAT
5. Whether the organisation already has an existing registration

Do not recommend a service only because the user mentions registration, tax, society, NGO or partnership.

5. Quick Service-Selection Guide

A. User wants to create a new cooperative society

Consider:

Cooperative Society Registration — Service ID 2

Ask whether the organisation is being registered for the first time.

Do not recommend the amendment service when no cooperative-society registration exists.

B. User wants to change an existing cooperative society

Consider:

Amendment of Cooperative Society — Service ID 17

Ask whether the society is already registered and what type of change is required.

Do not recommend a new registration unless the user is creating a different society.

C. User wants to register an NGO

Consider:

NGO Registration — Service ID 21

Ask what type of organisation the user is forming and whether they specifically need the NGO registration service available through SWAAGAT.

Do not automatically treat every society, trust, charitable group or non-profit organisation as eligible for this service. Exact applicability requires departmental verification.

D. User needs professional tax registration

Consider:

Application for Certificate of Professional Tax Registration — Service ID 8

Ask whether the user needs a new professional tax registration certificate.

Do not recommend return filing when the user has not yet obtained or does not have an applicable registration.

E. User already has professional tax registration and wants to file or pay

Consider:

Application for Profession Tax Return Filing & Tax Payment — Service ID 12 Ask

whether the user is filing a professional tax return or making the related tax payment.

Do not confuse registration with return filing.

Consider:

Application for VAT Registration — Service ID 18

Ask whether the requirement specifically concerns VAT registration.

Do not recommend VAT registration merely because the user asks about tax registration.
Confirm that the applicable tax is VAT.

G. User wants to create a new partnership firm

Consider:

Partnership Firm Registration — Service ID 9

Ask whether the partnership firm is being registered for the first time.

Do not recommend amendment if the firm is not already registered.

H. User wants to change an existing partnership firm

Consider:

Partnership Firm Amendment — Service ID 11

Ask whether the firm is already registered and what details need to be changed.

Do not recommend new registration merely because partners or firm details are changing.

6. Initial Clarification Questions

When the user gives a broad request, ask one or more of the following:

1. Are you forming a cooperative society, NGO or partnership firm?
2. Is this a new registration or a change to an existing registration?
3. Do you already have a registration certificate or registration number?
4. Are you asking about professional tax registration or professional tax return filing?
5. Does your requirement specifically concern VAT?
6. What type of organisation or business are you operating?
7. Are you creating a new organisation or modifying an existing one?

8. Important Distinctions

Cooperative Society vs NGO

A cooperative society is formed around cooperative objectives and is handled through the cooperative-society service.

An NGO may be a non-profit or social organisation, but the exact legal form covered by SWAAGAT must be verified.

Do not decide based only on the words “society,” “group,” “association” or “charity.”

Cooperative Society vs Partnership Firm

A cooperative society and a partnership firm are different organisational structures.

Ask about:

- Purpose of the organisation
 - Ownership or membership structure
 - Whether the organisation is commercial
 - Whether a partnership deed exists
 - Which authority the user was directed to approach
-

New Registration vs Amendment

Use registration when the organisation or taxpayer is applying for the first time.

Use amendment when an existing registration is being modified.

Always ask whether the user already has a registration number or certificate.

Professional Tax Registration vs Return Filing

Professional tax registration creates or obtains the applicable registration.

Professional tax return filing and payment are later compliance activities for an existing taxpayer.

Do not recommend return filing merely because the user mentions professional tax.

Professional Tax vs VAT

Professional tax and VAT are separate taxes.

Ask the user which tax or business activity is involved before making a recommendation.

Registration vs Live Application Status

Discovery documents help select the correct service.

Questions such as the following require live application data:

- Has my registration been approved? ☐ Did my payment succeed?
 - Why was my application sent back?
 - Can I download my certificate?
 - What is my application number?
-
