

SWAAGAT General Service Selection Guide

Document ID: SWAAGAT-DISCOVERY-GENERAL-001

Document Type: Service Discovery Guide

Scope: General SWAAGAT Service Selection

Language: English

Version: 1.0 Status: Status: Published — Department Verified and Approved for Chatbot Use

Purpose

This guide helps the SWAAGAT AI Assistant identify the correct service category when a user:

- Does not know the exact service name.
- Describes only their business activity or requirement.
- Asks which registration, licence, approval, certificate, amendment or renewal they need.
- Uses informal language, incomplete service names, spelling mistakes, Hindi or Hinglish.
- Confuses two or more related services.
- Needs help deciding which department or category may handle their requirement.

This guide is only for identifying possible services and asking clarification questions.

It must not be used to determine:

- The user's application status.
- The user's payment status. □ The user's certificate status. □ Final eligibility.
- Final fee amount.
- Required documents.
- CAF requirement.
- Processing time.
- Approval flow.
- Renewal cycle.
- Legal applicability.

Those details must come from the selected service's generated knowledge or live application data.

Service Selection Principle

The chatbot must not recommend a service from a single keyword.

For example:

- "I have labourers" is not enough to select one labour service.

- “I am opening a factory” is not enough to decide whether the user needs plan approval, a factory licence, electrical approval, pollution authorisation or another clearance.
- “I need a licence” is not enough to identify the correct licence.
- “My registration changed” is not enough to decide whether the user needs an amendment, renewal or a fresh application.

The chatbot should first understand:

1. What the user is doing.
2. Who the applicant is.
3. Whether this is a new application, amendment, renewal, return, closure or re-opening.
4. Whether an existing licence or registration already exists.
5. Whether the user knows the department or exact service.
6. Whether multiple services may apply.

Information to Collect Before Recommending a Service

The chatbot should collect only the details needed to narrow the service.

Applicant role

Examples:

- Individual
- Business owner
- Principal employer
- Contractor
- Manufacturer
- Dealer
- Repairer
- Importer □ Packer
- Factory owner
- Boiler owner
- Tour operator
- Hotel or resort owner
- Pet shop owner
- Dog breeder
- Supplier
- Property owner
- Medical facility
- Waste-processing operator

Business activity

Examples:

- Employing workers
- Supplying workers to another establishment
- Manufacturing goods
- Repairing weights or measures
- Selling weights or measures
- Packing commodities
- Importing packaged commodities
- Operating a factory
- Installing a boiler
- Running a hotel
- Operating a bar
- Applying for a trade licence
- Constructing or modifying a building
- Handling hazardous, biomedical, construction or solid waste
- Applying for electricity, water or sewerage connections

Application purpose

The chatbot should distinguish:

- New registration
- New licence
- New approval
- Amendment
- Renewal
- Return filing
- Tax payment
- Closure
- De-registration
- Re-opening □ Certificate
- Connection
- Permission
- Authorisation
- Existing licence upload

Existing approval or licence

Ask whether the user already has:

- A registration number.
- A licence.
- A certificate.
- An existing approval.
- An application already submitted.

- An externally issued licence not currently recorded in SWAAGAT.

Service Selection Flow

Step 1: Check whether the user has named an exact service

When the user clearly names a service, use that service.

Example:

User: “What documents are required for Renewal of Factory License?” Action:

- Resolve the exact service.
- Do not start general service discovery.
- Use the selected service’s generated documents section.

Step 2: Check whether the user has named a department or broad category

Example:

User: “I need something from the Labour Department.”

Action:

- Search the relevant category guide.
- Ask what activity and application type are involved. **Step 3: Identify the real-**

world requirement

Example:

User: “I supply workers to companies.” Possible
category:

- Labour services.

Clarification:

- Are you the labour contractor or the principal employer?
- Are interstate migrant workers involved?

- Is this a new licence, amendment or renewal?

Step 4: Determine the application type

Ask whether the request is for:

- New application
- Amendment
- Renewal
- Return
- Closure
- Re-opening
- Existing licence upload

Step 5: Retrieve possible services

Search the appropriate category discovery guide.

Return a small shortlist, normally no more than three services.

Step 6: Explain why each service may apply

Each candidate should include:

- Exact service name.
- Service ID, when available.
- Department.
- A short reason why it may match.
- The missing detail needed to confirm it.

Step 7: Ask one focused clarification question

Do not ask five questions at once unless they are all necessary.

Prefer the question that best separates the candidates. **Step**

8: Let the user select or confirm the service

Once confirmed:

- Set the selected service as the active service.
- Stop using broad discovery.
- Use the service-specific overview, documents, fees, approval flow, renewal and certificate sections.

Main SWAAGAT Service Categories

The active service catalog includes services across Labour, Factories and Boilers, Legal Metrology, Electrical and Power, Urban Development, Pollution and Waste, Tourism, Excise, business registration, taxation, infrastructure and other regulated activities.

Labour Services

Use the Labour Services Selection Guide when the user mentions:

- Labourers
- Contract labour
- Principal employer
- Labour contractor
- Interstate migrant workers
- Plantation workers
- Motor transport workers
- Beedi or cigar workers
- Labour returns
- Amendment of labour registration
- Contractor licence

Typical clarification:

“Are you the principal employer engaging workers through a contractor, or are you the contractor supplying the workers?”

Factories and Boilers Services

Use the Factories and Boilers Services Selection Guide when the user mentions:

- Starting a factory
- Factory plan approval
- Revised factory plan
- Factory licence
- Factory licence renewal
- Factory licence amendment
- Factory closure
- Factory re-opening
- Boiler registration
- Boiler certificate renewal
- Steam pipeline
- Boiler manufacturer
- Boiler erector
- Boiler repairer

- IBR welder
- Factory return or report

Typical clarification:

“Is this for a new factory, an existing factory, a factory licence, a boiler, or a pipeline-related approval?”

Legal Metrology Services

Use the Legal Metrology Services Selection Guide when the user mentions:

- Weights and measures
- Manufacturing measuring instruments
- Repairing weighing instruments
- Selling weights and measures
- Packaged commodities
- Packer registration
- Importer registration
- Legal Metrology licence

Typical clarification:

“Are you manufacturing, repairing or dealing in weights and measures, or are you packing or importing packaged commodities?”

Electrical and Power Services

Use the Electrical and Power Services Selection Guide when the user mentions:

- Electrical line clearance
- Building-plan electrical clearance
- DG set energisation
- Transformer energisation
- New electricity connection
- Temporary power connection
- Net metering
- Solar connection

Typical clarification:

“Do you need an electrical safety approval, energisation approval, a new connection, temporary power or net metering?”

Business Registration and Tax Services

Use the Business Registration and Tax Services Selection Guide when the user mentions:

- Cooperative society
- NGO registration
- Partnership firm
- Partnership amendment
- Professional tax registration
- Professional tax return
- Professional tax payment
- VAT registration

Typical clarification:

“Are you registering a new organisation or firm, amending an existing registration, or filing and paying tax?”

Urban Development Services

Use the Urban Development Services Selection Guide when the user mentions:

- Trade licence
- Building permit
- Construction permission
- Building-plan revision
- Demolition and reconstruction
- Occupancy certificate
- Sewerage connection
- Urban water connection
- Signage permission
- Hoarding
- Property tax
- AMC or non-AMC area

Typical clarification:

“Is the property within AMC or outside AMC, and do you need a trade licence, building approval, occupancy certificate, connection or tax payment?”

Pollution and Waste Management Services

Use the Pollution and Waste Management Services Selection Guide when the user mentions:

- Hazardous waste
- Biomedical waste
- Construction and demolition waste
- Solid waste
- Waste processing
- Recycling
- Treatment
- Disposal
- Pollution authorisation

Typical clarification:

“What type of waste does your establishment generate or handle?”

Tourism Services

Use the Tourism Services Selection Guide when the user mentions:

- Homestay
- Hotel
- Resort
- Tour operator
- Travel agent
- Tourist guide
- Tourism registration
- Tourism renewal

Typical clarification:

“Are you registering a homestay, hotel or resort, a tour operator or travel agency, or applying as a tourist guide?”

Excise Services

Use the Excise Services Selection Guide when the user mentions:

- Brewery
- Distillery
- Bottling plant □ Bar licence
- Denatured spirit
- Wholesale spirit
- Supplier registration
- Label registration
- Excise licence

- Letter of Intent or LOI

Typical clarification:

“Is your requirement related to manufacturing, bottling, a bar, denatured spirit, supplier registration or label registration?”

Land, Water and Infrastructure Services

Use the Land, Water and Infrastructure Services Selection Guide when the user mentions:

- Land allotment
- Change in land use
- Water resources
- Drinking water
- Water connection
- Sewerage
- Industrial infrastructure
- Property development

Typical clarification:

“Do you need land allotment, land-use conversion, a water-resource service, or a drinking-water or urban connection?”

Other Regulated Business Services

Use the Other Regulated Business Services Selection Guide when the user mentions:

- Sale or possession of poisons
- Pet shop
- Dog breeding
- Animal-related establishment registration
- Other regulated commercial activities

Typical clarification:

“Are you applying for a poisons licence, pet-shop registration or dog-breeding establishment registration?”

New Application, Amendment and Renewal Rules

These three purposes must never be treated as interchangeable.

New application

Use when:

- The user does not already have the relevant registration or licence.
- The user is setting up a new establishment or activity.
- The user is applying for the first time.

Amendment

Use when:

- An existing registration or licence already exists.
 - The user wants to change registered information.
- The portal provides a specific amendment service.

The chatbot must not recommend a new registration when an amendment service is available and the user only wants to change existing details.

Renewal

Use when:

- The existing licence, registration or certificate is nearing expiry or requires periodic renewal.
- A separate renewal service or renewal cycle is available.

The chatbot must not claim that renewal is available without checking the selected service's current renewal configuration.

Fresh application after expiry

Do not assume that an expired licence can always be renewed.

The selected service's verified renewal rules must decide whether:

- Renewal is available.
- A fresh application is required.
- A late fee applies.
- A renewal window exists.

Registration, Licence, Approval, Certificate and Authorisation

These words have different meanings and must not be used interchangeably.

Registration

Usually records an establishment, entity, applicant or activity with the concerned authority.

Licence

Usually grants permission to perform a regulated activity.

Approval

Usually permits a proposed plan, installation, activity or process.

Certificate

Usually confirms an approval, inspection, registration or compliance outcome.

Authorisation

Usually permits the handling, processing, storage, treatment or disposal of a regulated material or activity.

The chatbot should preserve the exact name used in the selected SWAAGAT service.

Native and Third-Party Services

Some services are completed within SWAAGAT, while others may redirect or connect to an external departmental portal.

When the service mode is third-party:

- Explain that the service may continue through the concerned external portal.
- Do not promise that every form, payment or status will be available inside SWAAGAT.
- Use the configured service information to explain the next step. □ Do not invent an external URL.

When the service mode is native:

- The application process is handled through the SWAAGAT workflow, subject to the current service configuration.

CAF Requirement

CAF means Common Application Form.

The general discovery guide must not decide whether CAF is required.

After a service is selected, the chatbot must check the selected service's generated overview section.

Possible answers:

- CAF required: Yes
- CAF required: No
- CAF requirement not configured

Do not treat CAF as a document.

Do not route a CAF question only to the documents section.

Existing Licence Upload

When a user says:

- "I already have a licence."
- "My licence was issued offline."
- "My old certificate is not visible."
- "Can I upload an existing licence?"

The chatbot should determine whether the user is asking to:

1. Upload an externally issued existing licence.
2. Apply for a new licence.
3. Renew an existing licence.
4. Amend an existing licence.
5. Check an application already submitted.

The user's actual uploaded licence information must come from live account data.

Candidate Recommendation Rules

The chatbot may recommend a service only when there is enough verified information.

High-confidence recommendation

A service may be recommended directly when:

- The user clearly describes the applicant role.
- The business activity is clear.
- The application purpose is clear.
- Only one verified service matches.

Example response:

“Based on your description, the most relevant service appears to be **[Service Name]** under **[Department]**. You said you are [applicant role] and need [application purpose].”

Medium-confidence shortlist

When two or three services may apply:

“Your requirement may match one of these services:

1. **[Service A]** — because...
2. **[Service B]** — because...

To identify the correct one, please confirm: [single clarification question].”

Low-confidence case

When the requirement is too broad:

“I need one more detail before suggesting a service. Are you looking for a new registration, amendment, renewal, approval, connection or certificate?”

Clarification Question Bank

Use only questions relevant to the current requirement.

Applicant

- Are you applying as an individual, business, contractor, employer, manufacturer, dealer or another type of applicant?
- Are you the owner of the establishment or acting on behalf of another organisation?

Current stage

- Is this a new application, amendment or renewal?
- Do you already have an existing licence or registration?
- Has an application already been submitted?

Activity

- What business or regulated activity are you carrying out?
- What are you manufacturing, selling, repairing, operating or handling?

Location

- Is the property within AMC or outside AMC?
- Is the activity connected with an industrial area, urban area or another location category?

Workers

- Are the workers directly employed or supplied through a contractor?
- Are any interstate migrant workers involved?
- Are you the principal employer or contractor?

Factory and boiler

- Is the factory new or already operating?
- Is your requirement for a factory plan, factory licence, boiler, pipeline or closure?

Waste

- What type of waste is generated or handled?
- Is the activity related to generation, processing, recycling, treatment or disposal?

Questions That Require Service-Specific Knowledge

After selecting a service, use generated service knowledge for:

- Is CAF required?
- Which documents are required?
- Which documents are optional?
- What is the application fee?
- How is the fee calculated?
- What is the approval flow?
- Which department processes the service?
- What is the configured processing target?
- Is the service renewable?
- What is the renewal cycle?
- What certificate or NOC is issued?
- What is the certificate validity?
- Can an existing licence be uploaded?

Questions That Require Live User Data

Use Laravel live data for:

- What is my application status?
- Has my payment been completed?
- How much did I pay?
- Which department currently has my application?
- Why was my application sent back?
- Which documents have I uploaded?
- Which document is missing from my application?
- Has my certificate been issued?
- When does my certificate expire?
- Which of my licences require renewal?
- What action should I take on my current application?

Example Conversations

Example 1: Broad labour question

User:

“I have labourers. Which service should I apply for?” Assistant:

“Labour-related services depend on how the workers are engaged. Are you the principal employer hiring workers through a contractor, or are you the labour contractor supplying the workers?”

Example 2: Factory setup

User:

“I am starting a factory. What approvals do I need?”

Assistant:

“A factory setup may involve more than one approval. Is your immediate requirement for a new factory plan drawing, factory licence, electrical approval, boiler approval or another clearance?”

Example 3: Weights and measures

User:

“I deal in weighing machines. Which licence is required?” Assistant:

“Please confirm your activity: do you manufacture, repair or sell weights and measuring instruments? Different Legal Metrology services apply to each activity.”

Example 4: Building approval

User:

“I want to construct a commercial building.” Assistant:

“Is the property within AMC or outside AMC, and are you seeking a new construction permit or revising an existing approved building plan?”

Example 5: Waste authorisation

User:

“My hospital generates waste.” Assistant:

“Your requirement may relate to biomedical-waste authorisation. Please confirm whether the establishment is a hospital, clinic, laboratory or another healthcare facility and whether you generate or handle biomedical waste.”

The final recommendation must be verified using the Pollution and Waste Management Services Selection Guide.

Example 6: Existing licence

User:

“I already have an old licence issued by the department.” Assistant:

“Do you want to upload the existing licence into SWAAGAT, renew it, amend its details, or check whether a new application is required?”

Example 7: User knows exact service

User:

“Is CAF required for Grant of Factory License?” Assistant

behavior:

- Do not use general discovery.
- Select Grant of Factory License.
- Retrieve its overview section.
- Answer using the current CAF configuration.

AI Restrictions

The chatbot must follow these rules:

- Do not invent a service.
- Do not invent a department.
- Do not invent eligibility criteria.
- Do not invent thresholds, worker counts, investment limits or legal conditions.
- Do not invent fees.
- Do not calculate the final payable amount from discovery text.
- Do not invent required documents.
- Do not guarantee approval.
- Do not guarantee a processing date.
- Do not recommend a service merely because one keyword matches.
- Do not treat amendment as a new application.
- Do not treat renewal as an amendment.
- Do not treat a return-filing service as registration.
- Do not treat a principal employer as a labour contractor.
- Do not confuse manufacturer, dealer, repairer, packer and importer.
- Do not confuse a factory plan approval with a factory licence.
- Do not confuse building permission with occupancy certification.
- Do not describe third-party services as fully processed within SWAAGAT unless verified.
- Do not use test, demo or generic placeholder services as recommendations.
- Do not mention RAG, embeddings, vector databases, prompts or internal system architecture to users.

Test and Placeholder Service Rule

Services having names such as:

- Test service
- Demo service
- TEST-prefixed service

- Generic “Others”

must not be recommended to public users unless an administrator explicitly verifies and activates them for service discovery.

Information Priority

When multiple sources contain information, use this priority:

1. Live user application and payment data.
2. Current generated service configuration.
3. Verified category-specific service selection guide.
4. This general service selection guide.
5. Safe clarification response.

The general guide must never override a current service-specific configuration.

Recommended Answer Format

When one service is identified:

“Based on the information provided, the most relevant service appears to be **[Service Name]** under **[Department]**.

Reason: [short verified reason].

Before you proceed, please confirm: [remaining clarification, only when needed].” When multiple services are possible:

“Your requirement may match these services:

1. **[Service Name]** — [reason]
2. **[Service Name]** — [reason]

To identify the correct one, please confirm: [single best clarification question].” When verified information is unavailable:

“I could not identify a reliable service from the available information. Please tell me your business activity, applicant role, and whether this is a new application, amendment or renewal.”

Common User Phrases

The chatbot should understand statements such as:

- Which service should I apply for?
- Mujhe kaunsa licence chahiye?
- I want to start a business.
- I am opening a factory.
- I employ labourers.
- I supply workers to companies.
- I already have a licence.
- Mera licence renew karna hai.
- Registration me change karna hai.
- I want to manufacture weighing machines.
- I sell weighing instruments.
- I run a hotel.
- I want a trade licence.
- I am constructing a building.
- I need an electricity connection.
- I have biomedical waste.
- I need permission for a bar.
- I want to register a pet shop.
- I do not know the department.
- Which approval is required?
- New registration ya amendment?
- Existing licence upload kaise karu?

Final Rule

The role of the SWAAGAT General Service Selection Guide is to guide the user toward the correct category and collect missing information.

It must not make a final legal or eligibility decision.

Once a service is identified, all further answers must use the selected service's current generated knowledge and, where applicable, the user's live application data.
