

SWAAGAT Pollution and Waste Management Services Selection Guide

Department: Tripura State Pollution Control Board — TSPCB

Document type: Service Discovery and Selection Guide

Status: Published — Department Verified and Approved for Chatbot Use
English

Purpose

This guide helps users identify the most relevant pollution and waste-management service available through SWAAGAT.

It covers service selection only. It does not determine final legal applicability, eligibility, authorization requirements, fees, documents, processing time or approval.

After the correct service is identified, the chatbot must obtain the latest documents, fees, application process and other service details from the generated service knowledge.

Services Covered

1. Service ID 98 — Authorization under the Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016
2. Service ID 99 — Authorization under Construction and Demolition Waste Management Rules
3. Service ID 100 — Authorization under Bio-Medical Waste Management Rules, 2016
4. Service ID 101 — Authorization under Solid Waste Management Rules, 2016

General Service-Selection Rules

- Do not recommend a service only because the user mentions the word “waste.”
- First identify what type of waste is generated, handled, processed, stored, recycled, transported or disposed of.
- Ask what activity the user or organization performs.
- Distinguish industrial hazardous waste from general solid waste.
- Distinguish biomedical waste from normal office, commercial or municipal waste.
- Distinguish construction and demolition debris from other solid waste.
- A user may need more than one environmental authorization when multiple waste streams are involved.
- Do not invent legal thresholds, exemptions or application requirements.
- Do not guarantee that an authorization is mandatory without verified departmental rules.
- Do not provide legal conclusions based only on the business name.

- When information is insufficient, ask clarification before recommending a service.

Quick Selection Guide

Consider Service 98 when:

The user's activity involves hazardous or other waste generated by an industrial, manufacturing, processing, recycling, treatment, storage, transportation or disposal activity.

Consider Service 99 when:

The activity involves waste generated from construction, demolition, repair, renovation or remodelling work.

Consider Service 100 when:

The activity involves biomedical waste generated or handled by a healthcare, diagnostic, veterinary, research, treatment or similar facility.

Consider Service 101 when:

The organization is involved in processing, recycling, treatment or disposal of solid waste that does not primarily fall under hazardous waste, biomedical waste or construction and demolition waste.

1. Authorization under the Hazardous and Other Wastes Rules

Service ID: 98

Department: TSPCB

Configured service name: Authorization under the Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016

Common Names and Aliases

- Hazardous waste authorization
- Hazardous waste licence
- Industrial hazardous waste permission
- Hazardous waste management approval
- Hazardous waste disposal authorization

- Hazardous waste recycling authorization
- Industrial waste permission
- Hazardous waste consent
- Hazardous waste registration

Who Should Consider This Service?

A business, industry, facility or operator whose activity may involve the generation, collection, storage, packaging, transportation, use, treatment, processing, recycling, recovery, utilisation, transfer or disposal of hazardous or other wastes should consider this service.

The official rules cover facilities involved in these categories of hazardous or other waste activity.

Consider This Service When

- The unit generates hazardous waste from an industrial or manufacturing process.
- The business stores or handles hazardous waste.
- The applicant treats, processes or recycles hazardous or other waste.
- The organization transports or transfers hazardous waste.
- The business recovers, reuses or utilises materials classified as hazardous or other waste.
 - The facility sends hazardous waste to an authorised treatment or disposal facility.
- The user specifically mentions industrial chemicals, contaminated sludge, process residue, used oil or another potentially regulated industrial waste.
- The user has been asked by TSPCB or another authority to obtain hazardous-waste authorization.

Do Not Recommend This Service When

- The waste is only normal office or household-type solid waste.
- The waste is construction debris such as concrete, bricks, soil or demolition material.
- The waste is biomedical waste generated by a hospital, clinic, laboratory or veterinary facility.
- The user is only asking about pollution consent and has not mentioned hazardous waste.
 - The waste type has not yet been identified.
- The user merely says that the business produces “waste” without explaining the material or activity.

Clarification Questions

1. What type of waste does your unit generate or handle?
2. Is the waste generated from an industrial or manufacturing process?
3. Do you generate, store, transport, process, recycle, treat or dispose of the waste?
4. Does the waste contain chemicals, oil, sludge, solvents, metals or contaminated material?

5. Has the waste already been classified as hazardous or other waste by the department?
6. Are you the waste generator, transporter, recycler, processor or disposal facility?
7. Is the waste imported, exported or transported across borders?
8. Are you applying for a new authorization, amendment or renewal?

Related or Easily Confused Services

- Service 101 — Solid Waste Management authorization
- Service 100 — Bio-Medical Waste authorization
- Service 99 — Construction and Demolition Waste authorization
- Pollution consent or consent-to-establish/operate services, when separately available

Common User Phrases

- My factory generates chemical waste.
- We produce industrial sludge.
- I need permission for hazardous waste.
- Used oil dispose karne ke liye kaunsa licence chahiye?
- We recycle industrial waste.
- My unit stores hazardous material waste.
- Hazardous waste authorization kaise milega?
- I operate a waste-treatment facility.
- We transport hazardous waste.
- Factory ke waste ke liye TSPCB approval chahiye.

Recommendation Restriction

Do not recommend this service merely because the user operates a factory.

First confirm that the activity involves waste covered under hazardous or other waste rules. When classification is uncertain, advise the user that TSPCB verification is required.

2. Construction and Demolition Waste Management Authorization

Service ID: 99

Department: TSPCB

Current SWAAGAT service name: Authorization under Construction and Demolition Waste Management (Management and Handling) Rules, 2016

Important Current-Rule Verification

The configured SWAAGAT title refers to the 2016 rules.

The Environment (Construction and Demolition) Waste Management Rules, 2025 came into force on 1 April 2026 and superseded the earlier rules. The department must verify whether this SWAAGAT service remains applicable in its current form or should be renamed, redirected or replaced.

Until this verification is completed, the chatbot should present this service only as a possible match and should not guarantee that this is the current application route.

Common Names and Aliases

- Construction waste authorization
- Demolition waste permission
- C&D waste approval
- Building debris permission
- Construction debris disposal approval
- Demolition debris registration
- Construction waste management service
- Building waste licence
- C and D waste registration

Who Should Consider This Service?

A project owner, contractor, operator, recycler or organization involved in construction, demolition, renovation, remodelling or repair activities that generate construction and demolition waste may need to consider the applicable C&D waste-management process.

Construction and demolition waste may include materials such as soil, sand, concrete, bricks, masonry, metal, wood, plastic and ceramics generated from these activities.

Consider This Service When

- A building or structure is being constructed.
- An existing building or structure is being demolished.
- Renovation or remodelling will generate significant debris.
- Repair work generates construction material waste.
- A road, bridge, pipeline, utility or infrastructure project generates C&D waste.
- The applicant operates a C&D waste collection or processing facility.
- The applicant recycles construction and demolition material.
- The applicant has been directed to prepare or submit a construction-waste management plan.
- The user specifically mentions concrete, bricks, rubble, soil, debris or demolition waste.

Do Not Recommend This Service When

- The user generates industrial hazardous waste.
- The waste is biomedical waste.
- The waste is ordinary commercial, office or municipal solid waste.
- The user only wants building-plan approval or a construction permit.
- No construction, demolition, renovation, repair or remodelling activity is involved.
- The user only wants permission to demolish a building but has not asked about waste management.
- The current departmental route under the 2025 rules has not been verified.

Clarification Questions

1. Are you constructing, demolishing, repairing or renovating a structure?
2. What type and approximate quantity of waste will be generated?
3. Is the applicant the project owner, contractor, recycler or waste-facility operator?
4. Is this a building project, infrastructure project, road project or utility project?
5. Will waste be processed at the site or sent to another facility?
6. Do you need waste authorization, a waste-management plan or only building permission?
7. What is the project's built-up area?
8. Has the local authority or TSPCB directed you to register under the current C&D rules?

Related or Easily Confused Services

- Construction permit or building-plan approval
- Permission for demolition and reconstruction
- Service 101 — Solid Waste Management authorization
- Service 98 — Hazardous and Other Wastes authorization
- Local-authority construction-waste services

Common User Phrases

- I am demolishing a building.
- Construction debris kahan dispose karna hai?
- We generate concrete and brick waste.
- I need approval for demolition waste.
- Building renovation waste permission chahiye.
- We recycle construction debris.
- I am starting a C&D waste recycling facility.
- Road construction waste ke liye registration chahiye?
- Do I need permission for building rubble?

Recommendation Restriction

Do not confuse construction-waste authorization with building-plan permission.
Before recommending this SWAAGAT service, verify the current departmental process under the rules effective from 1 April 2026.

3. Authorization under Bio-Medical Waste Management Rules

Service ID: 100

Department: TSPCB

Configured service name: Authorization under Bio-Medical Waste Management (Management and Handling) Rules, 2016

Common Names and Aliases

- Biomedical waste authorization
- Hospital waste licence
- Medical waste permission
- Clinic waste authorization
- Healthcare waste approval
- Biomedical waste certificate
- BMW authorization
- Medical waste disposal approval
- Hospital waste registration

Who Should Consider This Service?

A person or organization that generates, collects, receives, stores, transports, treats, processes, disposes of or otherwise handles biomedical waste should consider this service.

This can include hospitals, nursing homes, clinics, dispensaries, veterinary institutions, laboratories, blood banks, clinical establishments, medical camps and certain research or educational institutions.

Consider This Service When

- A hospital or nursing home generates biomedical waste.

- A clinic, dispensary or diagnostic centre handles biomedical waste.
- A pathology laboratory or blood bank generates biomedical waste.
- A veterinary hospital, clinic or animal facility generates biomedical waste.
- A healthcare facility handles syringes, dressings, pathological waste or other biomedical waste.
- The applicant operates a common biomedical waste treatment facility.
- The organization collects, transports, treats or disposes of biomedical waste.
- A medical, vaccination, surgical, health or blood-donation camp generates biomedical waste.
- The user has been asked to obtain biomedical-waste authorization from TSPCB.

Do Not Recommend This Service When

- The waste is only general office, kitchen or commercial waste.
- The activity only involves pharmaceutical sales and does not generate or handle biomedical waste.
- The waste is construction debris.
- The waste is industrial hazardous waste unrelated to medical or healthcare activity.
- The user only needs registration of a clinic or trade licence.
- The user only has ordinary household medical waste.
- The user says “medical business” but does not explain whether biomedical waste is generated.

Clarification Questions

1. What type of healthcare or related facility do you operate?
2. Does the facility generate or handle biomedical waste?
3. Are you a hospital, clinic, laboratory, blood bank, veterinary facility or treatment operator?
4. Do you generate sharps, contaminated materials, pathological waste or other clinical waste?
5. Do you send waste to a common biomedical waste treatment facility?
6. Are you the waste generator or the treatment/transport operator?
7. Is this a permanent facility or a temporary medical or vaccination camp?
8. Are you applying for a new authorization, amendment or renewal?

Related or Easily Confused Services

- Service 98 — Hazardous and Other Wastes authorization
- Service 101 — Solid Waste Management authorization
- Drug licence or clinical-establishment registration
- Trade licence
- Consent to establish or consent to operate, when separately applicable

Common User Phrases

- I run a clinic. Which waste permission do I need? □ Hospital waste licence chahiye.
- Biomedical waste authorization kaise apply kare?
- I have a pathology laboratory.
- We dispose of syringes and medical waste.
- Veterinary clinic ke waste ke liye approval chahiye.
- I operate a blood bank.
- Medical camp waste permission required?
- We collect biomedical waste from hospitals.

Recommendation Restriction

Do not recommend this service merely because the user works in the medical sector.

First confirm that the facility generates, receives, stores, transports, treats or otherwise handles biomedical waste.

4. Authorization under Solid Waste Management Rules

Service ID: 101

Department: TSPCB

Configured service name: Authorization under Solid Waste Management (processing, recycling, treatment and disposal of solid waste) Rules, 2016

Common Names and Aliases

- Solid waste authorization
- Solid waste processing licence
- Waste recycling permission
- Municipal waste authorization
- Solid waste treatment approval
- Solid waste disposal permission
- Waste-processing facility registration
- Solid waste recycling licence
- Municipal solid waste approval

Who Should Consider This Service?

An organization or operator involved in processing, recycling, treatment or disposal of solid waste may need to consider this service.

This service should normally be considered for structured solid-waste management activity rather than for every business that produces ordinary daily waste.

Consider This Service When

- The applicant operates a solid-waste processing facility.
- The applicant recycles or treats solid waste.
- The applicant operates a solid-waste disposal facility.
- The organization handles municipal or similar solid waste.
- The applicant operates a composting, material-recovery or waste-treatment activity.
- A local authority or waste operator needs authorization for a solid-waste facility.
- The user has been directed by TSPCB to apply for authorization under solid-waste rules.
- The waste does not primarily fall under biomedical, hazardous or construction and demolition waste categories.

Do Not Recommend This Service When

- The waste is classified as hazardous or other waste.
- The waste is biomedical waste.
- The waste consists mainly of construction and demolition debris.
- The user is merely a shop, office or small business disposing of ordinary daily waste through the municipal system.
- The user only wants a trade licence for a waste-related business.
- The activity involves only collection and the applicable authorization requirement has not been verified.
- The user has not explained whether the business is a generator, processor, recycler, operator or disposal facility.

Clarification Questions

1. What type of solid waste do you handle?
2. Are you a waste generator, collector, processor, recycler, treatment operator or disposal facility operator?
3. Is the waste municipal, commercial, institutional or industrial?
4. Does the waste contain hazardous, biomedical or construction material?
5. What process do you perform—sorting, composting, recycling, treatment or disposal?
6. Do you operate a dedicated waste-management facility?
7. Are you working for a local authority or as a private operator?
8. Has TSPCB or another authority asked you to obtain this authorization?

Related or Easily Confused Services

- Service 98 — Hazardous and Other Wastes authorization
- Service 99 — Construction and Demolition Waste authorization
- Service 100 — Bio-Medical Waste authorization
- Local municipal solid-waste permissions
- Trade licence
- Pollution consent services, when separately applicable

Common User Phrases

- I want to start a waste-recycling plant.
- Solid waste licence kaunsa hai?
- We process municipal waste.
- I operate a composting facility.
- Waste-treatment plant ke liye approval chahiye.
- We recycle general solid waste.
- I want permission for a waste-disposal facility.
- Municipal waste processing authorization required?
- I run a material-recovery facility.

Recommendation Restriction

Do not recommend this authorization to every business that produces ordinary waste.

First confirm that the applicant performs a regulated solid-waste processing, recycling, treatment, facility-operation or disposal activity.

Cross-Service Clarification Flow

When the user says:

I need a waste licence.

Ask:

1. What type of waste do you generate or handle?
2. Is it industrial hazardous waste, biomedical waste, construction debris or general solid waste?

3. What role do you perform—generator, transporter, collector, recycler, processor, treatment facility or disposal facility?
4. Are you applying for a new authorization, amendment or renewal?
5. Has TSPCB already identified the authorization you require?

Decision Guidance

When the user says “factory waste”

Do not immediately recommend hazardous-waste authorization.

Ask whether the waste contains chemicals, oils, sludge, process residue, contaminated material or another classified hazardous waste.

When the user says “hospital waste”

Ask whether the facility generates or handles biomedical waste.

If yes, Service 100 is the likely candidate.

When the user says “building debris”

Ask whether it arises from construction, demolition, repair or renovation.

Service 99 may be relevant, subject to verification under the current 2025 rules.

When the user says “recycling plant”

Ask what material is being recycled.

- Hazardous industrial waste may indicate Service 98.
- General solid waste may indicate Service 101.
- Construction debris may indicate Service 99.
- Biomedical waste treatment may indicate Service 100. **When the user**

handles multiple waste types

Do not force a single recommendation.

Explain that separate rules or authorizations may apply to separate waste streams and ask the user to identify each waste type.

Sample Chatbot Conversations

Example 1 — Ambiguous Waste

User: I run a factory and need waste permission.

Assistant: What type of waste does your factory generate? For example, chemical waste, used oil, industrial sludge, ordinary solid waste, biomedical waste or construction debris?

Do you generate the waste only, or do you also store, transport, recycle, treat or dispose of it?

Example 2 — Hazardous Waste

User: My manufacturing unit generates chemical sludge.

Assistant: Authorization under the Hazardous and Other Wastes Rules may be relevant.

Before confirming, please tell me whether your unit only generates the sludge or also stores, transports, processes, recycles or disposes of it. Final applicability should be verified by TSPCB.

Example 3 — Biomedical Waste

User: I have a pathology laboratory. Which waste licence do I need?

Assistant: Bio-Medical Waste authorization may be relevant because pathology laboratories can generate or handle biomedical waste.

Do you send the waste to an authorised common treatment facility, or do you perform any treatment or disposal yourself?

Example 4 — Construction Waste

User: We are demolishing an old commercial building.

Assistant: The construction and demolition waste-management process may be relevant.

Please confirm whether you are the project owner, contractor, recycler or waste-facility operator. The applicable route should also be checked under the rules effective from 1 April 2026.

Example 5 — Recycling Facility

User: I want to start a waste recycling unit.

Assistant: The correct service depends on the material you plan to recycle.

Is it industrial hazardous waste, normal solid waste, construction debris or biomedical waste?

Example 6 — Ordinary Business Waste

User: My shop produces paper and food waste. Do I need Solid Waste authorization?

Assistant: This service is generally intended for solid-waste processing, recycling, treatment or disposal activities rather than every shop producing ordinary daily waste.

Please confirm whether you operate a waste-management facility or only hand over normal waste through the local collection system.

AI Answer Rules

- Use this guide only to identify possible services. □ Do not use it to determine the user's final legal obligation.
- Do not invent thresholds, exemptions, documents, fees or timelines.
- Do not guarantee approval.
- Do not claim that a service is mandatory based only on one keyword.
- Ask what type of waste is involved.
- Ask what role the applicant performs.
- Distinguish waste generation from processing, recycling, treatment, transportation and disposal.
- Distinguish hazardous, biomedical, construction and general solid waste.
- Do not expose internal RAG metadata or service-ranking scores.
- Once a service is selected, use generated service knowledge for documents, fees, processing time and application procedure.

- Use live application data for the user's application status, payment and authorization status.
- When legal applicability is uncertain, say that TSPCB verification is required.
- For Construction and Demolition Waste questions, do not present the 2016 rules as the current rules without departmental verification.
